

Air1 on the local FM Broadcast is revolutionary. To many stations just plain music with no real meaning and too many commercials and jiber-jaber. Which is leading thousands of teens to depression, sex, and/or suicide. Air1 provides encouraging music with inspirational messages and no commercials freeing us of the corporate America. To get rid of the ability for Air1 to reach my community and others would be detrimental to society. So I pray you make the right choice and choose to keep the FM Broadcast so that we have a postive alternative to what most of the radio plays. Thank you for your time and have a nice day. =)
